

CONVERGED SOLUTIONS

COMMUNICATION MADE SIMPLE

With the ever increasing reliance on technology in today's business world, across multiple platform environments, applications and locations. It makes CTO's and IT Directors task challenging to deliver operational efficiencies to their business.

Converged Solution

Converged IT is an increasingly important investment for businesses looking to improve productivity and efficiency while reducing IT costs. PMGC can help drive the changes needed to consolidate and simplify your IT infrastructure within a fully managed environment with cloud based services. PMGC's capacity for integrating such bespoke connectivity through our cloud based managed services leverages on our existing Vodafone Mobile and Hosted Telephony platforms is what we are renowned for.

Converged Potential

Getting the balance of your existing investments and enhancing them with smarter technologies is vital in order to create and deliver the optimum blend of what you have and where you wish to be. PMGC has the expertise and technology leadership to help you transform your business infrastructure and communication that benefit businesses of every size, industry, and geography. By consolidating your IT resources to work better together, smarter and efficiently.

Converged Infrastructure

We help by designing, integrating and fully managing your requirement needs by utilising our hosted cloud platforms services to deliver secure access to your existing core business applications such as MS Office 365, SharePoint, Skype for Business, CRM, etc. via our flexible Desktop-as-a-Service (DaaS) solution. Our DaaS can be aligned to your existing Mobile or Vodafone One Net Business telephony solution providing complete integration.

DELIVER CLOUD SERVICES FASTER AND WITH MINIMAL BUSINESS DISRUPTIONS

SmartDesk VDI Solution

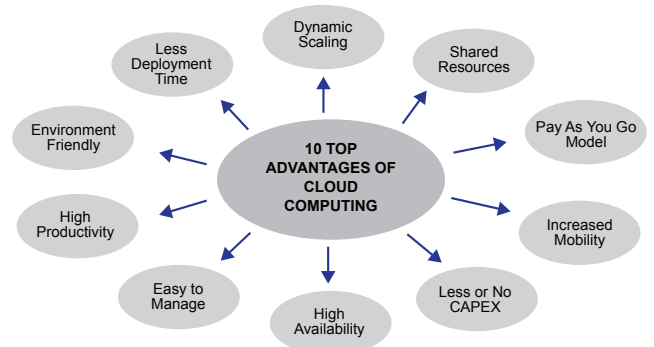

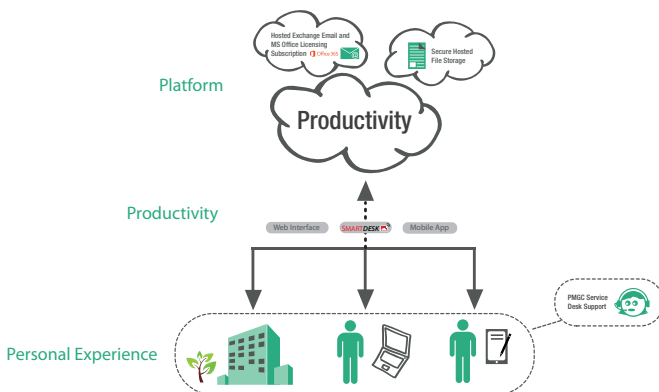

PMGC SmartDesk is a Virtual Desktop Infrastructure (VDI) that provides straightforward delivery of cloud-hosted desktops, to any device, anywhere. SmartDesk is just like a standard Microsoft Windows desktop but, Instead of the settings, data and operating system being stored on your local office PC or laptop, everything runs from a server in our secure state-of-the-art data centre powered by NaviSite.

How does SmartDesk Work

Each user is provided with their own SmartDesk environment, giving them secure access to their files, data and business applications, from any internet connected device. Users can work from the office, on the road, at home or even when meeting a client, without your business data ever leaving the secure data centre.

All the files, user profiles, applications and data are held securely, in the cloud, regardless of where employees choose to work or what device they work from. When combined with hosted data storage and email solutions, such as Microsoft Office 365, SmartDesk can provide a scalable, flexible, resilient and fully hosted business IT infrastructure.

Empower your business with the choice to work how you want, where you want, without being limited by hardware or location.

SMARTDESK

Why choose PMGC Converged Solutions:

- ✓ Operational efficiency improvement for all users no matter where
- ✓ Ensures the organisation is future proofed for onward changes
