

CLOUD HOSTED DESKTOP SOLUTION

COMMUNICATION MADE SIMPLE

The idea of Desktop as a Service is becoming more attractive for organisations to reducing CapEx and to give employees maximum flexibility and a better, customisable user experience.

Empower your Business

Today, more and more businesses are experience the many benefits of moving away from physical desktops in favour of Desktop as a Service (DaaS). This transition already has helped many businesses reduce IT management challenges, significantly reduce costs, improve workforce productivity and deliver an enhanced user experience by allowing employees to access corporate files, applications and services on any device, any time and anywhere.

Introducing SmartDesk

SmartDesk is a virtual hosted DaaS environment that securely provides straightforward delivery of cloud-hosted desktop (Windows 7), to any device, anywhere.

All the files, user profiles, applications and data are held securely, in the cloud, regardless of where employees choose to work or what device they work from. When combined with hosted data storage and email solutions, such as Office 365, SmartDesk can provide a scalable, flexible, resilient and fully hosted business IT infrastructure.

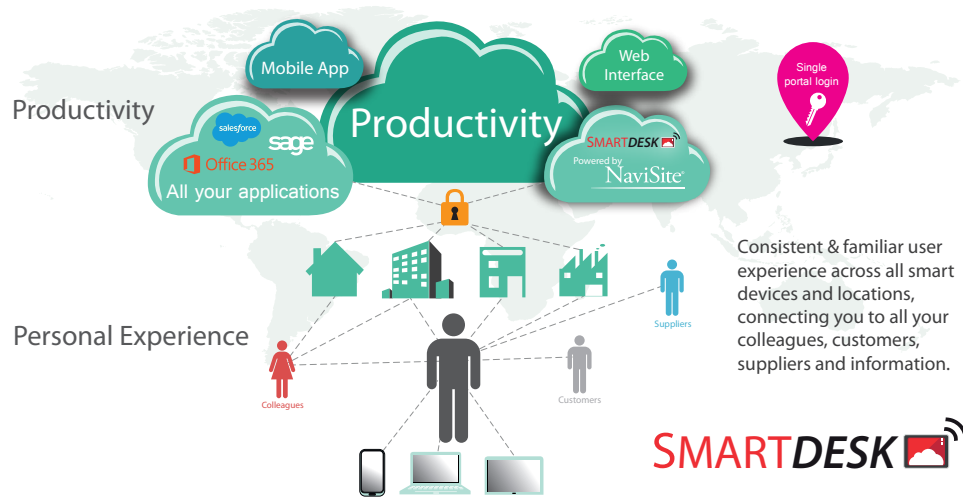

Cloud Makes the Complex Easy

Each user is provided with their own SmartDesk environment, giving them secure access to their files, data and business applications, from any internet connected device. Users can work from the office, out the office, at home or even when meeting a client, without your business data ever leaving the secure data center.

Empower your business with the choice to work how you want, where you want, without being limited by hardware or location.

Transform your PC environment through Cloud-hosted desktop to any device, anywhere

All of your office information from any location, any device.

The Advantages of Desktops as a Service

With desktop refresh cycles growing longer, many IT managers, COO and CFOs find it challenging to deploy across organisational upgrades. At the same time, maintaining aging client systems equipment is an expensive resource draining exercise.

Cost Effective

In a conventional desktop environment, new software can impose costly hardware upgrades. The hosted nature of SmartDesk allows existing client hardware to remain unchanged saving money and time.

Enhanced Mobility & Flexibility

SmartDesk enables you to access your corporate data, emails and files from anywhere, using handheld devices such as tablets and smartphones as well as on other laptops and desktops. You can access Microsoft Windows based operating systems on multiple devices. Moreover with SmartDesk, you will no longer need to close and save your files on your desktop whenever you shut down your device, meaning that files can be kept open on your virtual hosted desktop and accessed from any location.

Integrated Security and Control

With SmartDesk, you can ensure that your data will be securely stored in our secure state-of-the-art data center. SmartDesk offers Business Continuity solutions by ensuring that your employees can access their desktops and applications without interruption even after a natural disaster or an office down situation.

Benefits to IT Administrators

- Quickly and easily manage virtual desktop users
- Add or delete user accounts
- Reduces complexity and cost of replacing existing or deploying new PCs
- Enterprise level Integration
- Install corporate applications into the virtual environment
- Ensure compliance standards
- Lower cost for a standardised business PC experience
- Helps create strong disaster recovery strategy

Benefits to end-users

- Access corporate files, applications, resources and services on any device, any time and anywhere.
- Uphold the security standards which protect business-critical assets, without impeding efficiency
- Allows flexible working, giving secure access to your business desktop from any location and device
- Superior User Experience with access to high power computing from any device, anywhere
